

Python Interview Questions

Day 01 • Friends Version

1. What are the key features of Python?

Answer: Python has simple and readable syntax, is interpreted and dynamically typed, supports multiple programming paradigms, has a large library ecosystem, and is cross-platform.

Example:

```
print("Python is easy to read")
```

Output:

```
Python is easy to read
```

2. What is an interpreted language?

Answer: An interpreted language is generally executed by an interpreter at runtime. Python code is executed by the Python interpreter.

Example:

```
print(10 + 20)
```

Output:

```
30
```

3. What is indentation in Python?

Answer: Indentation is the whitespace at the beginning of a line used to define blocks of code. It is mandatory for if statements, loops, functions, and classes.

Example:

```
if 10 > 5:
    print("10 is greater")
```

Output:

```
10 is greater
```

4. How do you take input from a user in Python?

Answer: The input() function reads input from the user and returns the entered value as a string.

Example:

```
name = input("Enter your name: ")
print("Hello", name)
```

Output:

```
Enter your name: Alex
Hello Alex
```

5. What does the print() function do in Python?

Answer: The print() function displays values or text on the standard output.

Example:

```
name = "Python"
print("Hello", name)
```

Output:

Hello Python
